

Economics of Climate Policy

WORKSHOP SERIES

Estimating the impact of climate
change on US agriculture:
The importance of non-linear temperature effects

Wolfram Schlenker

Assistant Professor of International and Public Affairs and of Economics
Department of Economics
Columbia University

Wolfram Schlenker teaches classes in environmental and natural resource economics. His research interests include the economics of climate change, water rights, and their impact on agricultural output, as well as models of exhaustible resources with endogenous discoveries. His most recent publication is "Will U.S. Agriculture Really Benefit From Global Warming? Accounting for Irrigation in the Hedonic Approach" in *American Economic Review* (March 2005). He holds a PhD in agricultural and resource economics from the University of California, Berkeley (2003) and a Master of engineering and management sciences from the University of Karlsruhe, Germany (2000), as well as a Master of environmental management from Duke University (1998).

October 17, 2007, 3:00-5:00 pm
Tempe Center Room 158
Arizona State University, Tempe campus

Presented by
**APS, GLOBAL INSTITUTE OF SUSTAINABILITY,
& CENTER FOR ENVIRONMENTAL ECONOMICS AND SUSTAINABILITY POLICY**
