

Creative Reinvention

Printing your own activity cards:

- Print slides 2-7 on regular office paper
- Optional: crop the white margins
- Fold the paper in half
- Laminate the cards

Take a guess!

What is this playing surface made of?

Hint: It's made of something you might wear out!

Front

Old shoe soles can be turned into springy gym and playground surfaces. When shoes are worn out, they can still stay in the game!

There are lots of creative ways to reuse and recycle materials. Can you think of more ways to use old shoes?

Back

Take a guess!

Car airbag material can be made into a different kind of bag! Leftover scraps can be sewn into messenger bags.

There are lots of creative ways to reuse and recycle materials. Can you think of more things to make from tough fabric?

What is this bag made of?

Hint: It's made of a strong material that can keep us safe.

Take a guess!

Plastic milk jugs can be turned into toys! This way, we don't have to throw the bottles away or make new plastic.

There are lots of creative ways to reuse and recycle materials. Can you think of more ways to use recycled plastic?

What is this toy truck made of?

Hint: It's made of something that used to hold liquid.

Take a guess!

Animal manure can be used for fertilizer! Gardeners can use it to help their plants grow.

Ryan Hawk/Woodland Park Zoo

There are lots of creative ways to reuse and recycle materials!

What is this fertilizer made of?

Hint: It's made of something that zoo keepers have to clean up!

Take a guess!

Old shoe soles can be turned into springy gym and playground surfaces. When shoes are worn out, they can still stay in the game!

There are lots of creative ways to reuse and recycle materials. Can you think of more ways to use old shoes?

What is this playing surface made of?

Hint: It's made of something you might wear out!

Take a guess!

Old skateboard decks are turned into new phone cases! They're strong and they look cool, too.

There are lots of creative ways to reuse and recycle materials. Can you think of more ways to use old skateboards?

What is this phone case made of?

Hint: It's made from something that has wheels.

Take a guess!

Potato starch is used to make the bags potatoes are sold in! The starch reduces the amount of plastic needed to make the bags.

There are lots of creative ways to reuse and recycle materials!

What is this bag made of?

Hint: It's made of something that you can find at the grocery store.
