Sharon Hall, PhD (School of Life Sciences, ASU) is an ecologist that studies how humans interact with ecosystems.

Melissa Wilson-Sayres, PhD (School of Life Sciences, ASU) is a biologist that studies populations, evolution, and sex chromosomes.

Maclovia Quintana, MS (Yale School of Forestry and Environmental Studies) is an env. social scientist who works on increasing diversity in the environmental field.

Everyone is invited to an evening full of engaging stories and have a conversation on how these three scientists shaped their career paths to reach their goals.

Food and refreshments will be provided!

Wednesday, November 18, 2015
5:30 PM – 7:00 PM
Life Sciences E 244
